

## 2004

- Zaremba M.**, Urbanke C., Halford S.E., **Siksnyš V.** 2004. Generation of the *Bfi*I restriction endonuclease from the fusion of a DNA recognition domain to a non-specific nuclease from the phospholipase D superfamily. *J. Mol. Biol.* **336**, (1), 81-92.
- Siksnyš V.**, **Grazulis S.** and Huber R. 2004. Structure and function of the tetrameric restriction enzymes. In: Restriction endonucleases: structure function and evolution. A. Pingoud (ed.). Nucleic acids and molecular biology series. Springer Verlag, 237-259.
- Tamulaitienė G.**, **Grazulis S.**, Janulaitis A, Janowski R, Bujacz G, Jaskolski M. 2004. Crystallization and preliminary crystallographic studies of a bifunctional restriction endonuclease *Eco57I*. *Biochim Biophys Acta* **1698**, (2), 251-254.
- Venclovas C.**, Ginalski K., Kang C. 2004. Sequence-structure mapping errors in the PDB: OB-fold domains. *Protein Sci.* **6**, 1594-1602.
- Daujotytė D.**, **Serva S.**, **Vilkaitis G.**, **Merkienė E.**, **Venclovas Č.**, **Klimašauskas S.** 2004. HhaI DNA methyltransferase uses the protruding Gln237 for active flipping of its target cytosine. *Structure* **12**, (6), 1047-55.
- Slibinskas R.**, Samuel D., **Gedvilaite A.**, Staniulis J., **Sasnauskas K.** 2004. Synthesis of the measles virus nucleoprotein in yeast *Pichia pastoris* and *Saccharomyces cerevisiae*. *J. Biotechnol.* **107**, (2), 115-124.
- Bartkevičiūtė D.**, **Sasnauskas K.** 2004. Disruption of the *MNN10* gene enhances protein secretion in yeast *K. lactis* and *S. cerevisiae*. *FEMS Yeast Research* **4**, 833-840.
- Razanskiene A.**, Schmidt J., Geldmacher A., Ritz A., Niedrig M., Lundkvist A., Kruger D.H., Meisel H., **Sasnauskas K.**, Ulrich R. 2004. High yields of stable and highly pure nucleocapsid proteins of different hantaviruses can be generated in the yeast *Saccharomyces cerevisiae*. *J. Biotechnol.* **111**, (3), 319-33.
- Gedvilaite A.**, **Zvirbliene A.**, Staniulis J., **Sasnauskas K.**, Kruger DH, Ulrich R. 2004. Segments of Puumala hantavirus nucleocapsid protein inserted into chimeric polyomavirus-derived virus-like particles induce a strong immune response in mice. *Viral Immunol.* **17** (1), 51-68.
- Butrimiene I., Jarmalaite S., Ranceva J., Venalis A., Jasiuleviciute L., **Zvirbliene A.** 2004. Different cytokine profiles in patients with chronic and acute reactive arthritis. *Rheumatology* **10**, 1300-1304.
- Kan P.X., **Popendikyte V.**, Kaminsky Z.A. Yolken R.H., Petronis A. 2004. Epigenetic studies of genomic retroelements in major psychosis. *Schizophr. Res.* **67**, (1), 95-106.
- Pozdniakovaite N.**, **Popendikyte V.** 2004. Identification of differentially expressed genes in yeast *Saccharomyces cerevisiae* cells with inactivated Mmf1p and Hmf1p, members of proteins family YERO57c/YJGF. *Development Growth and Differentiation*, **46**, (6), 545-554.
- Žvirblienė A.**, **Gedvilaitė A.**, **Šamonskytė L.**, **Sasnauskas K.** 2004. Immunogenicity study of yeast-derived mumps nucleocapsid protein and production of monoclonal antibodies. *Acta Medica Lituanica* **11**, (3), 21-25.
